

Become a CUNY Sports Analyst

The **Open Data Lab** is building a student-driven sports analytics team focused on using data to support CUNY athletics — and we're looking for CUNY students interested in helping us grow it.

WHAT DO WE DO?

Using our growing CUNY sports database, students work with real collegiate sports data to create analytics, visualizations, and reports that provide meaningful insights for CUNY coaches, players, and teams.

TWO WAYS TO CONTRIBUTE

Sports Analytics

Turn sports data into scouting reports, metrics, and actionable coaching insights.

Data & Dev

Help collect, structure, automate, and expand database pipelines for CUNY sports teams.

WHAT COULD YOU WORK ON?

- ✓ Analyze team and player performance
- ✓ Build data visualizations for coaches & teams
- ✓ Expand data collection to additional CUNY sports
- ✓ Develop reproducible tools and analytical workflows

EXAMPLE SCOUTING REPORT

Table 1: Actual starting lineup compared with the data-driven proposed lineup

Player	Actual Starter	Proposed Starter	Recommendation
0 Player 1	No	Yes	Move In
1 Player 2	Yes	No	Move Out
2 Player 3	Yes	Yes	Keep
3 Player 4	Yes	Yes	Keep
4 Player 5	Yes	Yes	Keep
5 Player 6	Yes	Yes	Keep

Table 2 shows the current starting five alongside the lineup suggested by the Lineup Efficiency Rating.

Coach's Takeaway

The model suggests bringing **Player 1** into the starting five in place of **Player 2** based on the Lineup Efficiency Rating.

For the complete player ranking and additional methodology, see [Section 7.4](#).

2.3 Rotation & Efficiency Audit

This section reviews how Brooklyn's rotation changed across the last three seasons. For each season, the five

1 Executive Summary & Action Plan
2 Proposed Starting Five & Depth Chart
2.1 Depth Chart
2.2 Proposed vs. Actual Starting Lineup
2.3 Rotation & Efficiency Audit
2.4 Returning Core Progression
3 Game-Prep Watchlist
4 Team Identity & Splits
5 Statistical Drivers of Winning
6 Historical Program Context
7 Appendix

Other Formats
PDF

WHO ARE WE LOOKING FOR?

We are looking for students interested in sports, analytics, programming, and data visualization. Students from all CUNY colleges and academic backgrounds are encouraged to apply. **No prior sports analytics experience is required.**

WHAT YOU WILL GAIN & USE:

Sports Analytics

Data Visualization

SQL

R

Python

Quarto

GitHub

Reproducible Research

Technical Communication

Interested in joining?

Applications are now open to current CUNY students.
